PROFILE

UNSW Computer Science graduate with hands-on experience building and deploying full-stack web applications using React, FastAPI, Supabase/PostgreSQL and the OpenAI API. Built StudySprinter end-to-end across product flow, UI, backend, database and deployment, and contributed to Agile team delivery in a university capstone project. Seeking a junior frontend, full-stack or software engineering role where I can apply practical product-building, problem-solving and ownership skills.

SKILLS

Languages: JavaScript, TypeScript, Python, Java, C

Frontend: React, D3, HTML/CSS, UI/UX · **Backend & APIs:** FastAPI, REST APIs, OpenAI API

Databases: Supabase, PostgreSQL

Testing: Jest · **Tools & Deployment:** Git, Atlassian Forge, Vercel, Render

PROJECTS

StudySprinter: React, FastAPI, Supabase, OpenAI API, PostgreSQL 2026

Live Demo: <https://studysprinter.vercel.app>

GitHub: <https://github.com/annakuchina/studysprinter>

- Built a full-stack AI study app that turns a user-provided topic into reusable flashcards, quizzes and notes, with per-deck progress tracking
- Designed the product flow, React frontend, FastAPI backend and Supabase schema; integrated the OpenAI API and deployed end-to-end on Vercel and Render
- Implemented guest mode using localStorage, with account migration at sign-up

Jira Pets: React, JavaScript, Atlassian Forge (UNSW Capstone) 2026

Demo Video: <https://www.youtube.com/watch?v=36hbX5SzgYo>

- Contributed to a gamified Jira dashboard plugin built in a six-person Agile capstone team with mentorship from an Atlassian engineer, where completing tickets earned XP and maintained a virtual pet's health
- Designed the cat and dog graphics for different levels, built the level-up modal, pet reset modal and heart animation, and implemented backend logic for pet-health calculations
- Wrote Jest tests using Forge Bridge mocking, and collaborated through Agile planning, reviews and iterative delivery

EXPERIENCE

Woolworths · Online Team Member (Part-Time) Feb 2026 – Present

- Picked and packed customer orders for Click & Collect and home delivery in a fast-paced, high-volume environment
- Maintained accuracy and efficiency while meeting operational targets

Self-Employed · Mathematics & Computer Science Tutor Mar 2023 – Feb 2026

- Delivered tailored tutoring in mathematics and computer science across various academic levels
- Managed recurring lessons, client communication, scheduling, and lesson planning independently

EDUCATION

Bachelor of Computer Science (UNSW) Feb 2023 – May 2026

Exchange Semester: University of Barcelona

Feb 2025 – Jun 2025

WAM: 73.4 · Relevant coursework: Algorithm Design & Analysis (HD), Software Engineering Fundamentals (DN), Web Front-End Programming (DN), Human Computer Interaction (DN)

Involvement: UNSW Women in Technology (Publications Subcommittee, 2023) · UNSW Cybersecurity Society (Creative Subcommittee, 2023)
